E-Mail: shawn.e.abrell@gmail.com  
*Lead Counsel for Plaintiffs*

**Tyl W. Bakker**, OSB No. 90200  
621 SW Alder, Suite 621, Portland, Oregon 97205  
Tel.: 503.244.4157; Fax: 503.220.1913  
E-Mail: tylbakker@gmail.com  
*Local Counsel for Plaintiffs*

**United States District Court**

**District of Oregon**

**Portland Division**

**AHM**, by and through  
her Guardian *ad litem* and father,  
David Mark Morrison, and  
**David Mark Morrison**, individually,

v.

**Portland Public Schools,**

Defendant.

Civil Action No. 3:11-cv-00739-MO

**Declaration of Barry Trower**  
**Addendum A**

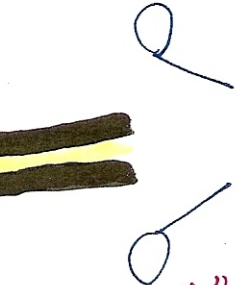

Child 'A' } Possible damage to first and subsequent generations.  
5-16yr.

⇔ ≈ 25+years ⇒

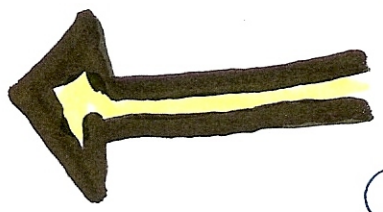

micro wave irradiation can cause oxidative or nitrosative stress to mitochondria ⇒ this DNA is 10x more susceptible to low level chronic microwave radiation than other DNA ⇒ Low histone protein content

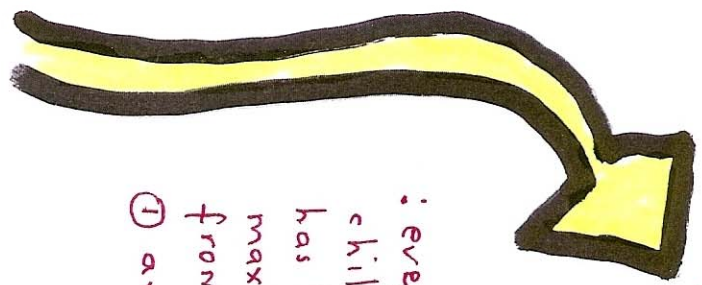

ovaries ≈ 400 000 follicles ≈ 400 to mature ≈ 14 each cycle to form egg of which one will/can be fertilized

⇨ i.e. mitochondriopathy for N<sub>2</sub> or O<sub>2</sub> is essential for Brain/Immune System

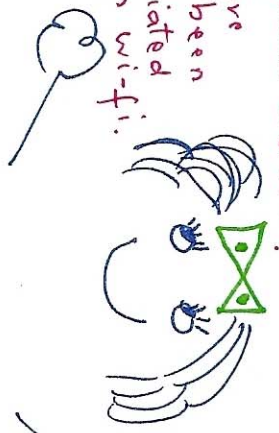

any DNA damage is irreparable and can pass to every female hence forth.

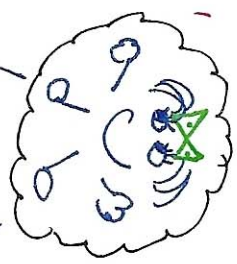

Child 'B' is now pregnant adult. child C

may have already been irradiated from wi-fi.

every aspect of child 'C's' life has been at maximum risk from stages ① and ② and ③

Child 'B' (Foetus) 100 days for follicles to form: no defence structure. (with possible DNA damage) hence 150+120d. to mature.

DNA damage

No protein 53 (x4) to fight radiation  
No nuclear core complex (x30) proteins: for defence.  
No factor 1 protein\* (apoptosis)  
of 100 000 protein structures only 600 are known.

photo sensitive ganglions: absorb rad: affect body functions:

- \* 7d = 100 cells
- 28d = heart
- 40d = eye
- 47d = fingers/feet

body is initially inside-out i.e. major organs are those most irradiated.

lady may not know she is pregnant at this stage: hence: no precautions.

••• the greatest risk is yet to come.

Bigger danger from school wi-fi irradiation on students & teacher

**Note:** 1st. 56d is

when all embryo are most vulnerable
