**Declaration of
Dr. Magda Havas, B.Sc., Ph.D.
Addendum B – Boston Petition**

PETITION TO AVERT HARMFUL, PUBLIC EXPOSURE TO PULSED MICROWAVE TRANSMISSION

We the undersigned physicians and scientists call upon public health officials to intervene to halt the initiation of communication transmissions employing ground level, horizontally transmitted, pulsed microwaves in Boston. This form of transmission is scheduled to begin in June, 1997, by the Sprint Corporation for personal communications systems (PCS). Given the biological plausibility of negative health impacts, particularly to the human nervous system, as well as anecdotal evidence of illness and death from such exposures in cities where transmission has already been implemented, and voluminous medical studies indicating human and ecological harm from microwaves, we urge the suspension of that implementation pending full public notification of potential hazards and the full review and determination of its safety by the scientific community.
